

# Moiz Baloch

AI / ML Engineer

moaiz3110@gmail.com | +92 306 7892235 | Multan, Pakistan | [linkedin.com/in/moiz-baloch-a615392b4](https://www.linkedin.com/in/moiz-baloch-a615392b4) | [github.com/igmoiz](https://github.com/igmoiz) | [moiz-baloch.vercel.app](https://moiz-baloch.vercel.app)

## SUMMARY

AI/ML Engineer with over a year of experience building and deploying machine learning systems, from stock-prediction models that drove ~30% revenue growth to production computer-vision and LLM fine-tuning projects.

## SKILLS

**ML Frameworks:** PyTorch, TensorFlow, Hugging Face (Transformers, PEFT, TRL), scikit-learn  
**ML Techniques:** XGBoost, LightGBM, CatBoost, Optuna, SHAP, QLoRA/LoRA, Feature Engineering  
**Computer Vision:** OpenCV, Ultralytics YOLO, ByteTrack, MediaPipe  
**Programming Languages:** Python, SQL, Dart, JavaScript  
**Data MLOps:** Pandas, NumPy, FastAPI, MLflow, DVC, Docker, Git, PostgreSQL

## EXPERIENCE

- AI/ML & Mobile Developer Intern at Brain Hub Technologies (Trade With Shaw), Multan, Pakistan** Jun 2025 to Oct 2025
- As the only AI/ML developer on the team, designed and deployed stock-price prediction models to improve trading profitability, using Python-based ML pipelines, contributing to a ~30% increase in trading revenue across internal operations and international client portfolios.
- Senior Mobile Application Developer (Remote) at Al-Safeena (Saudi Arabia), Remote** Oct 2025 to Jul 2026
- Built a home-services freelance marketplace to give Saudi vendors a centralized platform for consistent business, using Flutter and Node.js backends, contributing to a ~40% increase in company revenue.

## PROJECTS

- ResearchMate** 2026  
*Tech: Qwen2.5-3B, LoRA, Transformers, TRL, PubMedQA, arXiv*
- Fine-tuned a 3B instruction model to answer research questions from scientific literature, using LoRA on a 3,000-example PubMedQA/arXiv instruction dataset with 4-bit quantization.
- Smartphone Addiction Prediction (Kaggle)** 2026  
*Tech: LightGBM, XGBoost, CatBoost, Optuna, scikit-learn*
- Built a 4-model ensemble to predict smartphone addiction risk for a Kaggle competition, using Optuna-tuned hyperparameters and fold-safe target encoding, achieving Public LB 0.97094 and OOF AUC 0.969996.
- Red Blood Cell Anomaly Detection Pipeline** Jun 2024 to Jul 2024  
*Tech: XGBoost, SHAP, Ollama, Qwen2.5-7B*
- Built an end-to-end medical ML pipeline to accelerate blood-disease screening and reduce manual inspection, using XGBoost classification with ~92%+ validated accuracy and SHAP interpretability.

## EDUCATION

- B.S. Computer Science, Air University** Oct 2023 to Jun 2027  
Multan, Pakistan
- Relevant coursework: Machine Learning, Deep Learning, Data Structures & Algorithms, Databases

## CERTIFICATIONS

GIKI Advance AI Bootcamp, Ghulam Ishaq Khan Institute (Jul 2026 to Aug 2026)  
Anthropic Claude 101 Courses (incl. Claude Code), Anthropic (2026)
